Step 10

**Step 1:** Measure area where BrightLine will be installed.

**Step 2:** Cut mounting channel as required and secure to wall with screws.

**Step 3:** Measure BrightLine product to required length.

**Step 4:** Cut according to mark on the product (see table on following page for appropriate length of cut).

**Step 5:** Insert male pin connector in end of BrightLine product.

**Step 6:** Carefully slide pin connector into female receptacle on power cord.

Note: 1.67 amp power cord operates 96 ft of the 120V product and the 4.0 amp power cord operates 240 ft of the 120V product.

**Step 7:** Run a bead of electronic grade silicone around perimeter of receptacle on 120 volt power supply.

**Step 8:** Place shrink wrap over receptacle / power cord junction and apply heat with heat gun.

**Step 9:** Place end-cap or jumper on end of the run (repeat step 7 and 8 for end-cap or jumper).

**Step 10:** Insert BrightLine product into aluminum mounting channel.

**\* Do not energize until installation is complete. \***
